Drawing the Line 2011

Redistricting in Virginia

Number 2 March 2011

Virginia's General Assembly is moving quickly to redraw state legislative and congressional district lines following receipt of the 2010 census redistricting numbers from the United States Bureau of the Census on February 3, 2011. Article II, Section 6 of the Constitution of Virginia requires the General Assembly to redraw the districts in 2011, and new districts for the State Senate and House of Delegates must be in place for the state legislative elections regularly scheduled for this year. To allow time for redistricting plans to be reviewed and precleared by the United States Department of Justice as required by the federal Voting Rights Act, the 2011 General Assembly has delayed the 2011 primary date from June 14 to August 23 and adjusted various deadlines for filings and election preparations to accommodate the new primary date. (See 2011 HB 1507/Chapter 3).

Special Redistricting Session

The General Assembly convened in Special Session to take up the redistricting task immediately upon adjournment of the 2011 Regular Session on February 27. The General Assembly then recessed until April 4 to allow time for preparations for the actual redistricting. A series of public hearings is scheduled around the Commonwealth on March 31 and April 2, culminating with a hearing at the State Capitol on April 4. The hearings are being held jointly by the House and Senate Committees on Privileges and Elections, the standing committees with jurisdiction for redistricting legislation. A detailed list of locations, dates, and times for the hearings is to be found on page 11 of this publication.

The 2010 Census and District Populations

The detailed population numbers released by the Census Bureau revealed that Virginia's total population grew from 7,079,030 in 2000 to 8,001,024 in 2010, an overall increase of 921,994 or 13 percent. However, growth in rural and small city Southside, Southwest, and Western Virginia, as well as in the

urban Hampton Roads area, lagged behind the statewide average. The areas of above average to high growth include the outer suburban ring of Northern Virginia (Loudoun, Prince William, and Stafford Counties accounted for 40 percent of the statewide growth) and an I-95 and I-64 axis roughly defined by a Charlottesville-Fredericksburg-Williamsburg triangle.

The tables that begin on the next page show the effect of population changes on current House of Delegates, Senate, and Congressional districts. There is a wide variance in populations from the ideal district populations of 80,010 (House), 200,026 (Senate), and 727,366 (Congressional). The plus to minus deviation range for the House is + 138.2 percent to - 19.9 percent, and for the Senate, + 58.2 percent to - 14.9 percent. Courts have accepted a + 5 percent to - 5 percent deviation for state legislative districts; however, the House and Senate followed + 2 percent to - 2 percent criteria in drawing districts in 2001. The range for current Congressional districts is + 19.5 percent to - 11.2 percent, and no deviation is allowed for Congressional districts.

Track Redistricting on the Web

Those who wish to track the General Assembly's redistricting process may do so at the redistricting website maintained by the Division of Legislative Services at http://redistricting.dls.virginia.gov/2010/.

Posted on the website are detailed 2010 population data for districts, localities, and precincts. Visitors also will find updates on schedules, hearings, and other information as the process unfolds.

Detailed information and maps for each redistricting bill that is introduced, or plan that is otherwise made public, will be posted on the website. Of particular note is an interactive map feature for each plan that allows the reader to submit comments on the plan or particular parts of the plan, such as a district or locality.
